

CSE Model: Cassava Seed Entrepreneur Business Model

Transforming Cassava Farming Through Entrepreneurial Innovation!

The CSE Business Model empowers local entrepreneurs by providing training and certification in seed production and a straightforward digital quality-control platform, links them to buyers through pre-agreed contracts and cooperative financing, and has scaled to deliver over 110 million disease-free cuttings annually in Tanzania and Nigeria.

Climate impact

7

Problem

- Informal seed sharing and free handouts spread pests and diseases.
- Farmers lose over 50 % of potential yields due to poor-quality cuttings.
- Dependency on donations discourages local investment.

Solution

- Train and register CSE entrepreneurs to produce certified seed.
- Deliver 83 million clean cuttings/year in Tanzania, generating USD 1.5 M.
- Strengthen local seed systems for sustainable yield gains.

Key points to design your project

- Professionalize cassava seed systems by onboarding CSEs into formal roles, boosting food security, gender inclusion and climate resilience.
- Engage regulators, extension services and community groups with MoUs to define roles, data sharing and policy alignment.
- Deploy SeedTracker™ for digital plot registration, real-time dashboards and e-certification, supported by “train-the-trainer” workshops.
- Mobilize SACCOS/RLF finance, seed-production grants, M&E analytics and policy briefs to scale, sustain and refine the model.
