

Warrantage Inventory and Credit System

Grain in the Bank: Future Assurance

The warrantage inventory and credit system is a practical solution for small-scale farmers. It operates through a warehouse receipt mechanism, allowing farmers to store non-perishable crops (such as millet) in secure warehouses. In return, they receive inventory credit—loans against the stored grain.

Farmers deliver grain to warehouse, and an officer registers the quantity and quality

Problem

- **Limited Access to Credit and Limited Market Access:** Smallholder farmers struggle to access credit and secure storage facilities, affecting their ability to get fair prices for their crops.
- **Price Volatility and Seasonal Cash Flow:** Fluctuating market prices and seasonal income variations make it challenging for farmers to manage expenses and plan for the future.

Solution

- **Credit Access:** Warrantage lets farmers use stored crops as collateral, providing credit and overcoming collateral barriers.
- **Price Stability & Market Access:** Warrantage allows storing crops during surplus for sale during favorable prices, reducing volatility impact and ensuring better market access.
